PROFESSIONAL SUMMARY

DevOps Engineer with 2.5+ years of experience driving automation and modernizing cloud infrastructure across AWS and hybrid environments. Experienced in building secure, scalable systems, improving CI/CD pipelines, and delivering reliable cloud-native solutions that reduce operational complexity and support business growth.

PROFESSIONAL EXPERIENCE

System Engineer (L1) – DevOps | Deputy SOC Lead (Acting)

Sheba Platform Ltd – Full Time | Jashore, Khulna, Bangladesh

January 2025 – Present

- Owned deployment, configuration, and performance tuning of production systems across multiple environments.
- Designed and maintained CI/CD pipelines to enable fast, reliable, and repeatable releases.
- Managed and secured AWS infrastructure (EC2, RDS/Aurora, S3, ALB, Route 53, IAM, ACM).
- Implemented end-to-end monitoring and observability using Grafana, Prometheus and Zabbix.
- Performed root-cause analysis on incidents and implemented long-term stability and security fixes.
- Automated operational workflows to reduce manual effort and improve system reliability.
- Led operations and ensured smooth execution of day-to-day SOC activities.
- Coordinated cross-team priorities to maintain service continuity and incident response SLAs.
- Drove internal initiatives from planning to delivery, aligning operations with business goals.

Junior System Engineer – DevOps

Sheba Platform Ltd – Full Time | Jashore, Khulna, Bangladesh

July 2023 – December 2024

- Deployed services and monitored system/server health across environments.
- Built operational dashboards using Grafana, Superset and Metabase to support decision-making.
- Integrated alerts related to transactions, fraud, and infrastructure incidents.
- Resolved application and network issues to minimize downtime.
- Managed tickets and vendor coordination using ClickUp and gPlex.
- Automated routine tasks to improve operational efficiency.
- Troubleshoot infrastructure and application issues.
- Supported incident documentation and operational reporting.

IT Support Engineer

Walton Digi-Tech Industries Ltd – Contract | Bashundhara R/A, Dhaka, Bangladesh

June 2022 – July 2022

- Provided technical support for large-scale device monitoring initiatives.
- Assisted in maintaining enterprise hardware and software systems.

TECHNICAL SKILLS

- Cloud Services: AWS, Azure, GCP
- DevOps Tools: GitHub Actions, GitLab CI/CD, Docker, Jenkins
- IaC & Scripting: Terraform, Ansible, Bash, PowerShell, Google Apps Script
- Database: MySQL, PostgreSQL, MongoDB (Managed and Self-Managed)
- Monitoring: Grafana, Prometheus, Zabbix, Superset, Metabase
- Server OS: Linux (Ubuntu, CentOS, RHEL), Windows Server
- Virtualization Platforms: VMware, Proxmox
- Networking: DNS, VPC, Load Balancers, Route 53
- Access Control: IAM, Role-Based Access Control (RBAC)
- Version Control: Git, GitHub
- Automation & Orchestration: Cron Jobs, Systemd, Supervisor

SOFT SKILLS

- Leadership & Team Collaboration
- Problem Solving & Analytical Thinking
- Rapid Learning
- Effective Communication
- Grace Under Pressure
- Knowledge Sharing

KEY ACHIEVEMENTS

- Delivered 10+ automation solutions within the organization for improving efficiency and reliability..
- Designed and implemented 10+ CI/CD pipelines using GitHub Actions.
- Migrated legacy systems to Dockerized environments for improved maintainability and scalability.
- Executed 15+ cloud deployments and migrations across AWS.

EDUCATION

MSc in Computer Science & Engineering

Islamic University, Kushtia

2023 - 2024

CGPA 3.35 / 4.00

BSc in Computer Science & Engineering

Bangladesh University of Business and Technology - BUBT

2018 - 2022

CGPA 3.87 / 4.00

LANGUAGES

- English: Professional Proficiency
- Bangla (Bengali): Native / Full Proficiency
- Hindi: Basic / Conversational
