

MD SAYEDUR RAHMAN

Address: Jashore Sadar, Jashore, Khulna, Bangladesh

Mobile No: 01788790001

Email: srsayed2677@gmail.com

Career Objective:

Seeking a role within a structured and growth-oriented organization where I can apply a systematic approach to problem-solving, effective collaboration, and strong organizational skills. I aim to contribute to team efficiency and decision-making processes while continuously improving my ability to perform under pressure and adapt to new challenges.

Employment History:

1. System Engineer II (L1)

(January, 2025 – Present)

Sheba Platform Ltd

Jashore, Khulna, Bangladesh

Duties/Responsibilities

- Maintain and enhance server and system infrastructure, including deployment, configuration, performance tuning, and issue resolution.
- Perform DevOps tasks such as server provisioning, CI/CD pipeline management, container deployment, and automation of repetitive tasks.
- Conduct codebase reviews to identify potential performance, scalability, and security issues before deployment.
- Troubleshoot and resolve development-related issues affecting server performance, availability, and integrations.
- Deploy services, monitor and analyze server logs, diagnose issues, and implement solutions to ensure seamless system performance and security.
- Leverage database expertise to retrieve and analyze data for troubleshooting and debugging system errors.
- Develop and manage Superset and Metabase dashboards to provide insights into system performance, incidents, and key metrics.
- Administer VPN access and user permissions to ensure secure and efficient network connectivity.
- Develop and implement automation scripts to streamline processes and enhance team efficiency.
- Monitor transaction alerts, fraud alerts, and system errors, taking immediate corrective actions.
- Serve as the primary technical liaison for external vendors, management, and higher authorities.
- Efficiently manage, resolve, and track tickets via ClickUp and gPlex.
- Prepare daily, weekly, monthly, and incident reports on system performance, errors, and resolutions.
- Conduct regular checks of AWS VPNs, proxy responses, and server status to ensure smooth operations.
- Actively participate in team meetings, offering solutions and recommendations for system performance improvements.
- Implement process improvements and efficiency enhancements across system operations.
- Provide guidance and support to junior team members, promoting knowledge sharing and best practices.

2. Deputy DOC Lead (Acting)

(May, 2025 – Present)

Sheba Platform Ltd

Jashore, Khulna, Bangladesh

Duties/Responsibilities

- Coordinate closely with the SOC Lead to oversee security operations and ensure efficient workflow across the team.
- Supervise and support all business unit operations, ensuring seamless functionality and quick issue resolution.
- Troubleshoot and resolve technical issues affecting any business unit, maintaining service continuity.
- Lead and manage internal projects as Product Manager, from planning to execution, ensuring alignment with business objectives.
- Coordinate tasks and priorities across teams, ensuring timely completion of deliverables.
- Prepare and deliver operational reports to management, highlighting key activities, incidents, and performance insights.

3. System Engineer I (L1)

(January, 2025 – June, 2025)

Sheba Platform Ltd

Jashore, Khulna, Bangladesh

Duties/Responsibilities

- Deploy service, proactively monitor and analyze server logs, diagnose issues, perform debugging, and implement solutions to ensure seamless system performance and security.
- Leverage strong database knowledge to retrieve and analyze data for troubleshooting and debugging system errors, ensuring effective problem resolution.
- Develop and manage Superset and Metabase dashboards to provide visual insights into system performance, incidents, and key metrics, supporting decision-making and operational improvements.
- Administer VPN access and other user permissions, ensuring secure and efficient network connectivity across the platform.
- Develop and implement automation scripts to streamline processes and enhance team efficiency.
- Monitor transaction alerts, fraud alerts, and system errors, taking immediate corrective actions to maintain system integrity.
- Serve as the primary technical liaison for external vendors, management, and higher authorities, managing relationships and resolving issues as they arise.
- Efficiently manage, resolve, and track tickets via Clickup and gPlex, ensuring all issues are addressed in a timely manner.
- Prepare detailed daily, weekly, and incident reports, providing insights into system performance, errors, and resolutions.
- Conduct regular checks of AWS VPNs, proxy responses, and server status to ensure smooth operations and quick issue identification.
- Actively participate in team meetings, offering solutions and recommendations for system performance improvements.

4. Junior System Engineer

(February, 2024 – December, 2024)

Sheba Platform Ltd

Jashore, Khulna, Bangladesh

Duties/Responsibilities

- Monitor and analyze system alerts (transaction, fraud, server errors), ensuring swift response and troubleshooting to minimize downtime.
- Lead communication with external vendors for technical support, SLA adherence, and issue resolution. Manage user access controls for internal and external stakeholders.
- Manage and resolve support tickets using Clickup and gPlex, ensuring proper documentation, follow-up, and issue resolution.

- Conduct comprehensive checks on server status, AWS VPNs, and application performance to maintain system uptime.
- Identify and troubleshoot hardware, software, and network connectivity issues. Implement solutions efficiently and effectively.
- Actively participate in team meetings and cross-functional discussions, contributing to system improvements and incident resolution. Prepare and present detailed reports on system performance, incidents, and resolutions.
- Assist in maintaining logs, configuring admin portal access, and managing email accounts for users.

5. Trainee System Engineer
(July, 2023 – January, 2024)

Sheba Platform Ltd
Jashore, Khulna, Bangladesh

Duties/Responsibilities

- Monitor transaction alerts, fraud alerts, and system issues, ensuring prompt identification and resolution.
- System Health & Performance Checks: Perform routine checks on server statuses, VPNs, proxy responses, and application health to ensure optimal functioning.
- Log and manage support tickets via Clickup and gPlex, providing timely updates and following up on issues.
- Assist in diagnosing hardware, software, and connectivity issues, escalating complex problems as needed.
- Support the team with administrative tasks such as maintaining logs, configuring access, and managing user accounts.
- Participate in team discussions and contribute to daily and weekly reporting on system performance and incident handling.

6. IT Support Engineer
(June, 2022 – July, 2022)

Walton Digi-Tech Industries Ltd
Bashundhara R/A, Dhaka

Duties/Responsibilities

- Monitoring 3.97 lakhs Walton Tab by VMware workstation for the project of BBS (2022) with troubleshooting issues and providing technical support.
- Support the IT team in maintaining hardware, software and other systems.

Academic Qualification:

Master of Science (MSc) in Computer Science & Engineering

Islamic University
CGPA: 3.35 out of 4
2024 (1 year)

Bachelor of Science (BSc) in Computer Science & Engineering

Bangladesh University of Business and Technology (BUBT)
CGPA: 3.87 out of 4
2022 (4 years)

Higher Secondary Certificate (HSC) in Science

Satkhira Govt. College
CGPA: 4.00 out of 5
2017 (1 year)

Secondary School Certificate (SSC) in Science

Rasulpur Secondary School, Satkhira
CGPA: 5.00 out of 5
2015 (1 year)

Achievements:

Published Conference Paper

Paper Title: Comparison of Different CNN Model used as Encoders for Image Captioning

DOI: [10.1109/ICDABI53623.2021.9655846](https://doi.org/10.1109/ICDABI53623.2021.9655846)

Published Conference Paper

Paper Title: To Predict Customer Churn By Using Different Algorithms

DOI: [10.1109/DASA54658.2022.9765155](https://doi.org/10.1109/DASA54658.2022.9765155)

Published Conference Paper

Paper Title: Bahdanau Attention Based Bengali Image Caption Generation

DOI: [10.1109/DASA54658.2022.9765268](https://doi.org/10.1109/DASA54658.2022.9765268)

Specializations:

Fields of Specializations

- System Administration
- DevOps
- Cloud Infrastructure & Virtualization
- Database Management & Query Optimization
- Cybersecurity & Incident Response
- Problem Solving & Analytical Thinking
- Project Management
- Operations Leadership

Skills:

Technical Skills

- Linux and Windows Server Administration
- Server Management – Deploy, Logs, Patching, Backups
- CI/CD Pipeline Management
- Cloud Services – AWS, Azure, GCP
- Virtualization and Containers – VMware, Docker
- Git and GitHub for Source Control and Collaboration
- Database Querying for Debugging and Analysis
- Monitoring Dashboards – Superset, Metabase
- System Monitoring and Incident Response
- Automation and Scripting – Google Apps Script, Bash Script
- Network Configuration – Routers, Switches, Firewalls
- Project and Ticketing Tools – ClickUp, Jira, gPlex
- CC Dialer – gPlex, Digicon

Soft Skills

- Leadership & Decision Making
- Problem Solving & Analytical Thinking
- Teamwork & Communication
- Adaptability & Collaboration
- Time Management
- Incident Reporting
- Attention to Detail

Programming:

Programming Language: C, C++, Python, PHP, Javascript, Bash Script.

Solved many problems from URI, UVa, Codeforces, HackerRank etc.

Projects:

Industrial Projects

Dialer System Transition - gPlex to Digicon (July 2025 – August 2025)

Role: Project Manager

Sheba Platform Ltd

Jashore, Khulna, Bangladesh

- Led the end-to-end migration from the legacy dialer system to a modern, high-performance platform, ensuring zero downtime and minimal user disruption.
- Coordinated with cross-functional teams (technical, operations, vendor) to align project goals, timelines, and deliverables.
- Managed vendor communication, procurement, and integration processes for the new dialer system.
- Oversaw system configuration, user access control, and integration with CRM, analytics, and reporting tools.
- Conducted UAT (User Acceptance Testing) and system validation to ensure operational readiness and compliance with company standards.
- Created training materials and conducted knowledge transfer sessions for business users.
- Monitored post-implementation performance, handled early-stage issues, and optimized workflows for improved efficiency.
- Negotiated and signed Service Level Agreements (SLAs) with the vendor, defining clear performance, support, and maintenance commitments.
